INTRODUCTION

The Universal Dolphin $^{\rm TM}$ II Remote is Balboa's latest generation remote control. It is designed with sophisticated technology that will allow you to consolidate many of your existing remote controls along with the entertainment system in your spa. It's packed with easy-to-use features such as:

- Pre-programmed to operate the cable converter supplied by your cable system provider
- · Pre-programmed technology for easy setup
- Color-coded keys to quickly locate popular functions
- Code library for video and audio components
- Code Search to help program control of older components
- Learning function to allow programming with another infrared (IR) remote
- Combination IR and RF (radio frequency) capability that can send commands through the optional RF base station to devices in your house.

Before you can use your new remote control, you will need to program it to operate the specific home entertainment components you wish to control. Follow the instructions detailed in this manual to set up your Dolphin Remote and enjoy your new remote control.

IMPORTANT! PLEASE READ:

When you are required to enter an address into the spa, please write down the address you have selected for future reference. Address may need to be re-entered after servicing

Remote should be stored outside of spa when not in use. Do not store in direct sunlight.

FEATURES AND FUNCTIONS

Use the illustration below to locate the DolphinTM II RemotE features and study the key locations (on these two pages) to learn how they function.

FEATURES AND FUNCTIONS

...Continued

Use GUIDE to display the program guide.

Use EXIT to exit out of an on-screen menu and guide.

Use the four directional keys to move the cursor in the program guide and menu screens.

Use SELECT to choose options, PPV events, and to tune programs from the program guide.

Use INFO to display current channel and program information.

Press MENU once to display an on-screen menu.

INSTALLING BATTERIES

(See illustration on opposite page)

- 1. On the back of the Dolphin Remote, remove the screws that hold the battery cover in place and lift off the battery cover.
- 2 Obtain two (2) fully-charged AA alkaline batteries.

Match the + and - marks on the batteries to the + and - marks in the battery case, then insert the new batteries.

- 3. Press the battery cover back into place, being careful to align it with the rubber seal.
- 4. Replace the screws that hold the battery cover by carefully starting each one without tightening it. Once they are all started, snug up one screw and then do the same to the screw on the opposite side of the door. Repeat this in a crossing pattern until all screws are snug. Do not overtighten them. This will assure an adequate water seal around the battery cover.
- Test the unit by pressing any mode key (e.g., TV, VCR/DVD, CBL/SAT, RCVR, SPA, or CD).
 If the batteries are inserted correctly, the LED will blink once.

NOTE:

Whenever batteries need to be replaced, the Dolphin LED will blink twice with every key press. Simply replace the batteries and the remote will be restored to its full functionality, complete with your favorite settings.

SPA ADDRESSING

The Dolphin II technology is capable of eliminating interference that may occur when neighboring spa owners use Dolphin remotes.

Important: This feature will not function if your spa is controlled by RF via the Command Center, or if your spa is controlled by IR.

- If you notice the pumps, blower or light on your spa operating when your neighbor uses his Dolphin remote, check your spa manual to see if this feature is available on your system.
 If so, follow the procedure described in your spa manual to enter a spa address into your spa.
- 2 After entering the spa address into the spa, you are now ready to enter a set up code into the Dolphin Remote.
- 3. Press the SPA button on the Dolphin once
- 4. Press and hold SETUP until the LED blinks once. It will then blink twice.
- 5. Enter one of the set up codes below:

Set Up Code	Spa Address
0000	0 (no address)
0008	1
0080	2
0088	3
0800	4
0808	5
0880	6
0888	7

6. Write your Set Up code and Spa Address in the boxes below for future reference.

7. If the code is entered correctly, the LED will blink twice.

PROGRAMMING TV CONTROL

Locate the brand name of your TV in the Setup Codes For TVs section below, and write it in the following space.

TV Brand: _		

The brands are listed in alphabetical order with the most popular codes listed first. You will use one of these codes to program the Dolphin to operate your TV:

- 1. Turn on the TV.
- On the Dolphin, press TV once. Press and hold SETUP until the LED blinks twice, then release SETUP.
- Enter the first four-digit code for your TV. If you
 perform this procedure correctly, the LED will
 blink twice.

NOTE: If the LED did not blink twice after entering the code's last digit, repeat steps 2 through 3 and try entering the same code again.

- 4. Aim the Dolphin at your TV and press POWER once. The TV should turn off. If it does not respond, repeat steps 2-4, trying each code for your brand until you find one that works. If it still does not work, try searching for the code (see Searching For Your Code on page 25).
- Write your TV code in the boxes below for future reference.

NOTE: Remember, to use the Dolphin to operate your TV, press TV first.

PROGRAMMING VCR CONTROL

Locate the brand name of your VCR in the Setup Codes For VCRs section below, and write it in the following space.

VCR Brand:	

The brands are listed in alphabetical order with the most popular codes listed first. You will use one of these codes to program the Dolphin to operate your VCR:

- 1. Turn on your VCR and insert a video cassette.
- 2. On the Dolphin, press VCR once. Press and hold SETUP until the LED blinks twice, then release SETUP.
- 3. Enter the first four-digit code for your VCR. If you perform this procedure correctly, the LED will blink twice.

NOTE: If the LED did not blink twice after entering the code's last digit, repeat steps 2 through 3 and try entering the same code again.

- 4. Aim the Dolphin at your VCR and press POWER once. The VCR should turn off. If your VCR remote control does not have a POWER key, press PLAY. If the VCR does not respond, repeat steps 2-4, trying each code listed for your brand until you find one that works. If the VCR still does not work, try searching for the code (see Searching For Your Code on page 25).
- Write your VCR code in the boxes below for future reference.

	1	

NOTE: Remember to use the Dolphin to operate your VCR, press VCR first.

PROGRAMMING CABLE CONVERTER (OR SATELLITE RECEIVER) CONTROL

Locate the brand name of your Cable Converter (or Satellite Receiver) in the Setup Codes For Cable Converters (or Setup Codes For Satellite Receivers) section starting on the next page, and write it in the appropriate space.

Cable Converter Brand:	_
or	

Satellite Receiver Brand:

The brands are listed in alphabetical order with the most popular codes listed first. You will use one of these codes to reprogram the Dolphin to operate your Cable Converter or Satellite Receiver.

- 1. Turn on the Cable Converter or the Satellite Receiver.
- On the Dolphin, press CBL/SAT once. Press and hold SETUP until the LED blinks twice, then release SETUP.
- Enter the first four-digit code for your Cable Converter or Satellite Receiver. If you perform this procedure correctly, the LED will blink twice.

NOTE: If the LED did not blink twice after entering the code's last digit, repeat steps 2-3 and try entering the same code again.

- 4. Aim the Dolphin at your Cable Converter or Satellite Receiver and press POWER once. The unit should turn off. If it does not respond, repeat steps 2-4, trying each code listed for your brand until you find one that works. If it still does not work, try searching for the code (see Searching For Your Code on page 25).
- (see Searching For Your Code on page 25).

 5. Write your Cable Converter or Satellite Receiver code in the boxes below for future reference.

NOTE: Remember to use the Dolphin to operate your Cable Converter or Satellite Receiver, press CBL/SAT first.

PROGRAMMING DVD CONTROL

Locate the brand name of your DVD player in the Setup Codes For DVD Players section below, and write it in the following space.

DVD	Player	Brand
-----	--------	-------

The brands are listed in alphabetical order with the most popular codes listed first. You will use one of these codes to program the Dolphin to operate your DVD Player:

- 1. Turn on the DVD Player.
- On the Dolphin, press DVD once. Press and hold SETUP until the LED blinks twice, then release SETUP.
- Enter the first four-digit code for your DVD Player. If you perform this procedure correctly, the LED will blink twice.

NOTE: If the LED did not blink twice after entering the code's last digit, repeat steps 2 through 3 and try entering the same code again.

- 4. Aim the Dolphin at your DVD Player and press POWER once. The DVD Player should turn off. If it does not respond, repeat steps 2-4, trying each code for your brand until you find one that works. If it still does not work, try searching for the code (see Searching For Your Code on page 25).
- Write your DVD code in the boxes below for future reference.

				_

NOTE: Remember, to use the Dolphin to operate your DVD Player, press DVD first.

PROGRAMMING CD CONTROL

Locate the brand name of your CD Player in the Setup Codes For CD Players section below, and write it in the following space.

CD Player Brand:

The brands are listed in alphabetical order with the most popular codes listed first. You will use one of these codes to program the Dolphin to operate your CD Player:

- 1. Turn on the CD Player.
- On the Dolphin, press CD once. Press and hold SETUP until the LED blinks twice, then release SETUP.
- Enter the first four-digit code for your CD Player. If you perform this procedure correctly, the LED will blink twice.

NOTE: If the LED did not blink twice after entering the code's last digit, repeat steps 2 through 3 and try entering the same code again.

- 4. Aim the Dolphin at your CD Player and press POWER once. The CD Player should turn off. If it does not respond, repeat steps 2-4, trying each code for your brand until you find one that works. If it still does not work, try searching for the code (see Searching For Your Code on page 25).
- Write your CD code in the boxes below for future reference.

NOTE: Remember, to use the Dolphin to operate your CD Player, press CD first.

PROGRAMMING AUDIO CONTROL

Using the Dolphin's RCVR mode, you can also control an audio component, such as a stereo receiver or a stereo amplifier.

Locate the brand name of your audio component in one of accompanying code lists. Write it in the appropriate space.

Stereo Receiver Brand:	
or	
Stereo Amplifier Brand;	

The brands are listed in alphabetical order with the most popular codes listed first. You will use one of these codes to program the Dolphin to operate your audio component:

- 1. Turn on the audio component.
- On the Dolphin, press RCVR once. Press and hold SETUP until the LED blinks twice, then release SETUP.
- Enter the four-digit code for your audio component. If you perform this procedure correctly, the LED will blink twice.
 - NOTE: If the LED did not blink twice after entering the code's last digit, repeat steps 2 through 3 and try entering the same code again.
- 4. Aim the Dolphin at your audio component and press POWER once. The unit should turn off. If it does not respond, repeat steps 2-4, trying each code listed for your brand until you find one that works. If it still does not work, try searching for the code (see Searching For Your Code on page 25).
- 5. Write your audio component code in the boxes below for future reference.

NOTE: Remember to use the Dolphin to operate your audio component, press RCVR first.

SEARCHING FOR YOUR CODE

If your TV, VCR, Cable Converter, Satellite or Audio Component does not respond to the Dolphin after trying all of the codes listed for your brand, or if your brand is not listed at all, try searching for your code.

For example, to search for a code for your TV:

- 1. Turn on your TV.
- 2. On the Dolphin, press and hold SETUP until the LED blinks twice, then release SETUP.
- 3. Enter 9 9 1. The LED will blink twice.
- Aim the remote control at the TV and slowly alternate between pressing POWER and TV. Stop when the TV turns off.

NOTE: In the search mode, the Dolphin will send IR codes from its library to the selected component, starting with the most popular code first.

- 5. Press SETUP once to lock in the code.
- 6. To search for the codes of your other components, repeat steps 1 through 5, but substitute the appropriate key (i.e., VCR, CBL/SAT, DVD, CD, or RCVR) for the component you are searching for.

CHECKING THE CODES

If you have set up the Dolphin using the "Searching For Your Code" procedure, you may need to find out which four-digit code is operating your equipment:

For example, to find out which code is operating your TV:

- 1. Turn on your TV.
- 2. On the Dolphin, press and hold SETUP until the LED blinks twice, then release SETUP.
- 3. Enter 9 9 0. The LED will blink twice.
- 4. To view the code for the first digit, press 1 once. Wait 3 seconds and count the number of LED blinks (e.g., 3 blinks = 3) and write down the number in the leftmost TV Code box below. NOTE: If a code digit is "0", the LED will not blink.
- 5. Repeat step 4 three more times for remaining digits. Use 2 for the second digit, 3 for the third digit, and 4 for the fourth digit. Finish writing down the code in the TV Code boxes below.
- 6. To check for the codes of your other components, repeat steps 1 through 5, but substitute the appropriate key (i.e., VCR, CBL/ SAT, DVD, CD or RCVR) for the component you are checking. Write down the codes in the appropriate boxes below.

TV Code			
VCR Code			
CBL/SAT Code			
DVD Code			
CD Code			
RCVR Code			

REASSIGNING DEVICE KEYS

The Dolphin can be set up to control a second TV or VCR, or any combination of four home entertainment components. For example, to have the Dolphin control a TV, a Cable Converter, and two VCRs, you will need to reassign the unused RCVR key to operate the second VCR as follows:

- 1. On the Dolphin, press and hold SETUP until the LED blinks twice, then release SETUP.
- Enter 9 9 2. The LED will blink twice.
 Press VCR once, then press RCVR once.
- 4. The RCVR key is now ready to be programmed for your second VCR. (See Programming VCR Control on page 12.)

To reassign other device keys, repeat steps 1 through 4 by substituting the key sequence from the following chart for a desired component:

To Reassign	Perform Key Sequence
TV as 2nd VCR key:	SETUP - 9 - 9 - 2 - VCR - TV
TV as 2nd RCVR key:	SETUP - 9 - 9 - 2 - RCVR - TV
TV as 2nd CBL/SAT key:	SETUP - 9 - 9 - 2 - CBL/SAT - TV
TV back to TV	SETUP - 9 - 9 - 2 - TV - TV
VCR as 2nd TV key:	SETUP - 9 - 9 - 2 - TV - VCR
VCR as 2nd RCVR key:	SETUP - 9 - 9 - 2 - RCVR - VCR
VCR as 2nd CBL/SAT key:	SETUP - 9 - 9 - 2 - CBL/SAT - VCR
VCR back to VCR:	SETUP - 9 - 9 - 2 - VCR - VCR
RCVR as 2nd TV key:	SETUP - 9 - 9 - 2 - TV - RCVR
RCVR as 2nd VCR key:	SETUP - 9 - 9 - 2 - VCR - RCVR
RCVR as 2nd CBL/SAT key:	SETUP - 9 - 9 - 2 - CBL/SAT - RCVR
RCVR back to RCVR:	SETUP - 9 - 9 - 2 - RCVR - RCVR

Upon completion of a reassignment, the LED will blink twice to confirm your selection. At that time, you will also need to program the Dolphin to control the new component (as described earlier in this document).

SETTING VOLUME LOCK

The Dolphin can be set so that the volume control buttons will always control the same device no matter which device mode is selected.

If your TV is not remote controllable, or if you would like the volume to be controlled by a different component, you can change the Volume Lock setting to control volume through a non-associated mode (e.g., through the cable in the TV mode).

To Change Volume Lock to the CBL/SAT mode:

- 1. On the Dolphin, press and hold SETUP until the LED blinks twice, then release SETUP.
- 2. Enter 9 9 3 and then press CBL/SAT once. The LED will blink twice.
- Now ,whenever you press Volume +, Volume
 -, or MUTE on the Dolphin, volume will be controlled by your Cable Converter or Satellite.

To Change Volume Lock to the TV mode:

- 1. On the Dolphin, press and hold SETUP until the LED blinks twice, then release SETUP.
- 2. Enter 9 9 3 and then press TV once. The LED will blink twice.
- Now, whenever you press Volume +, Volume
 -, or MUTE on the Dolphin, volume will be controlled by your TV.

To Change Volume Lock to the VCR mode:

- 1. On the Dolphin, press and hold SETUP until the LED blinks twice, then release SETUP.
- Enter 9 9 3 and then press VCR once. The LED will blink twice.
- Now, whenever you press Volume +, Volume -, or MUTE on the Dolphin, volume will be controlled by your VCR.

To Change Volume Lock to the DVD mode:

- 1. On the Dolphin, press and hold SETUP until the LED blinks twice, then release SETUP.
- Enter 9 9 3 and then press DVD once. The LED will blink twice.
- Now, whenever you press Volume +, Volume
 -, or MUTE on the Dolphin, volume will be controlled by your DVD Player.

To Change Volume Lock to the CD mode:

- 1. On the Dolphin, press and hold SETUP until the LED blinks twice, then release SETUP.
- 2. Enter 9 9 3 and then press CD once. The LED will blink twice.
- Now, whenever you press Volume +, Volume
 -, or MUTE on the Dolphin, volume will be controlled by your CD Player.

To Change Volume Lock to the RCVR mode:

NOTE: Performing these steps will allow you to access the volume control of your audio component in all modes.

- 1. On the Dolphin, press and hold SETUP until the LED blinks twice, then release SETUP.
- Enter 9 9 3 and then press RCVR once. The LED will blink twice.
- Now, whenever you press Volume +, Volume
 -, or MUTE on the Dolphin, volume will be controlled by your audio component.

Clearing Volume Lock

The volume lock can be cleared so that the volume control buttons will control whatever device is selected.

To clear the volume lock:

- On the Dolphin, press and hold SETUP until the LED blinks twice, then release SETUP.
- 2. Enter 9 9 3 and then press Volume Up. The LED will blink 4 times when unlocked.

Clearing Volume Lock For One Device

The volume lock can be cleared for one specific device so that the volume control buttons will control that device when it is selected.

To clear the volume lock for a specific device:

- Press the device key for the unit to be unlocked.
- 1. On the Dolphin, press and hold SETUP until the LED blinks twice, then release SETUP.
- 2. Enter 9 9 3 and then press Volume Down. The LED will blink 4 times when unlocked.

USING THE LEARNING FEATURE

You can program the non-spa buttons to add functions that are unique to your home entertainment devices (e.g., VCR Tracking Up or Down).

NOTE: PLEASE HAVE YOUR ORIGINAL REMOTE CONTROLS ON HAND BEFORE PROGRAMMING THE LEARNING FEATURE. BE SURE TO PRESS EACH KEY WITHIN 10 SECONDS OF THE PREVIOUS ENTRY. IF 10 SECONDS PASS BETWEEN ENTRIES, THE REMOTE CONTROL WILL EXIT THE PROGRAMMING MODE.

Programming A Learning Key

- 1. Place your original remote control (e.g., TV remote control) at a 90° angle to the underside of the Dolphin Remote (1.5" to 2" apart). The original remote LED should point to the area directly in between the two footings on the underside of the Dolphin Remote. (See illustration on next page.)
- 2. Press and hold SETUP until the LED (red light) blinks twice, then release SETUP.
- 3. Enter 9 7 5. The LED will blink twice.
- 4. Press a device key once (e.g., TV) to assign a mode for learning.
- Press an open learning key once (e.g., Guide) to store a feature to be learned. The LED will blink rapidly.

NOTE: THE DOLPHIN LED LIGHT MUST BE BLINKING IN ORDER TO PROGRAM. IF AT ANY TIME DURING PROGRAMMING, THE DOLPHIN LED STOPS BLINKING, GO BACK TO STEP 1 AND START AGAIN.

- 6. On your original remote control, press and hold the key feature to be learned until the LED on the Dolphin Remote Control blinks twice. If the LED does not blink twice, repeat steps 3 through 6.
- 7. To learn functions onto other learning keys, repeat steps 3 through 6.
- 8. To exit learning mode, press and hold SETUP until the LED blinks twice, then release SETUP or wait 10 seconds.
- 9. To test a learned feature, press a device key (e.g., TV) once where the learning mode was assigned. Then press the learning key (e.g., Guide) where the learned feature is stored.

Deleting Functions From The Learning Keys:

- 1. Press and hold SETUP until the LED (red light) blinks twice, then release SETUP.
- 2. Enter 9 7 6. The LED will blink twice.
- 3. Press the device key once where the learned feature is stored (e.g., TV).

- 4. Press the learning key (e.g., Guide) twice. The LED will blink twice after the second press.
- 5. To clear additional functions stored on other learning keys, repeat steps 1 through 4 (in this section).

Feature Reset

This function will clear all volume lock and learned key functions. It does not clear device codes and mode reassignments.

- 1. On the Dolphin, press and hold SETUP until the LED (red light) blinks twice, then release SETUP.
- 2. Enter 9 8 0. The LED will blink 4 times when reset is complete..

NOTE: LEARNING SHOULD BE DONE INDOORS AND AWAY FROM FLUORESCENT LIGHTS.

USING THE IR/RF COMMAND CENTER

The Dolphin Remote Control (URC-9811) can be used with an optional IR/RF Command Center which receives radio-frequency (RF) signals from the Dolphin, up to 100 feet away*.

Once it is set up, the IR/RF Command Center will convert the RF signals into Infrared (IR) signals to control your home theater devices.

NOTE: The Dolphin remote control transmits both an IR and an RF signal simultaneously. It is your option whether you want to install the IR/RF Command Center for extended remote control range.

NOTE: The RF signal transmitted by the Dolphin remote control only works with the IR/RF Command Center.

Setting Up The IR/RF Command Center

- Find a location several feet in front of your home theater devices (TV, VCR, DVD, RCVR, etc.). It should provide line-of sight access to your equipment and a power outlet to plug in the IR/RF Command Center.
- Plug in the IR/RF Command Center's power cord and raise the telescoping antenna.
- Position the IR/RF Command Center so the black IR Lens is aimed at your home theater devices.
- 4. To test the IR/RF Command Center, take the Dolphin into another room in your home. Select a device key (e.g., TV) and press it once. Then press POWER once.

The device should turn on. If it does not turn on, review the steps 1 through 3 and make the necessary adjustments. Try step 4 again. If you continue to have a problem, perhaps there is an IR line-of sight problem. Try adding the IR Signal Extension Cord. Also review the tips in Optimizing IR/RF Command Center Reception.

Adding The IR Signal Extension Cord

Included with the IR/RF Command Center is an IR Signal Extension Cord for use with a home theater device that is not in direct line-of-sight of the IR/RF Command Center.

If you are having problems remotely controlling a home theater device from another room, try performing the following installation:

1. Plug the 4' IR Signal Extension Cord into the back of the IR/RF Command Center.

- Run the IR Signal Extension Cord to the device that is not in line-of-sight of the IR/RF Command Center.
- Using the supplied double-sided tape, attach the IR Signal Extension Cord so that its LED is over or next to the IR sensor of your home theater device.
- 4. Test the installation by again taking the Dolphin into another room in your home. Select a device key (e.g., TV) and press it once. Then press POWER once.

The IR/RF Command Center will convert the RF signal from the Dolphin into an IR signal and transmit that signal through the IR Signal Extension Cord to turn on your device (e.g., TV).

If it does not turn on, try repositioning the LED until the device can be controlled, then reattach the LED.

Optimizing IR/RF Command Center Reception

Here are some adjustment tips for optimizing the operation of your IR/RF Command Center:

- Aim the Dolphin toward the room where the IR/RF Command Center is located.
- Do not position the IR/RF Command Center near metal objects, such as heat ducts. Metal can block RF signals.
- Make sure the batteries in the Dolphin are fully charged. Try replacing them if you are not sure (see Installing Batteries on page 7). Weak batteries will affect the signal range.
- Make sure that the Dolphin is not being affected by other RF transmissions (e.g., garage door openers, cordless telephones, etc.).

*Distance Note for Command Center

Note: The Dolphin Remote will operate the Command Center at distances up to 100 feet in an open field. Range will be adversely affected by metal structures, objects blocking the signal path, antenna orientation or extension, radio frequency interference from other sources, or weak batteries in the Dolphin Remote.

SPECIFICATIONS

Remote Control Power

2 AA Batteries

IR/RF Command Center Power

120 VAC

Remote Control to IR/RF Command Center RF Range

COMPLIANCE WITH FCC RULES AND REGULATIONS

This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and radiates radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- · Reorient or relocate the receiver and antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment into an outlet that is different from that which the receiver is connected.
- Consult the dealer or an experienced radio/ television technician for help.

The user is cautioned that changes and modifications made to the equipment without the approval of the manufacturer could void the user's authority to operate the modified equipment.

FCC Authorization Label

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- 1. This device may not cause harmful interference; and
- This device must accept any interference received, including interference that may cause undesired operation.

FCC ID #: MG3URC033

Dolphin II Remote Control with RF

TROUBLESHOOTING

PROBLEM: LED does not blink when you press a key.

SOLUTION: Replace the batteries with two (2) new AA alkaline batteries (see page 7).

PROBLEM: LED blinks when you press a key, but home entertainment component does

not respond.

SOLUTION: Make sure you are aiming the Dolphin at your home entertainment component and

that you are within 15 feet of the component you are trying to control

PROBLEM: The Dolphin does not control home

entertainment components or commands

are not performing properly.

SOLUTION: Try all listed codes for the component brand being set up. Make sure all components can be operated with an

infrared remote control.

PROBLEM: TV/VCR combo does not respond properly.

SOLUTION: Use the VCR codes for your brand. Some combo units may require both a TV code and a VCR code for full operation (see pages 8-15).

PROBLEM: No volume on a second TV.

SOLUTION: Follow instructions in Changing Volume

Lock (see page 28).

CH+, CH-, and LAST do not work for your RCA TV. PROBLEM:

SOLUTION:

SOLUTION:

original remote control will operate these

functions. PROBLEM: Changing channels does not work properly.

SOLUTION: If original remote control required

pressing ENTER to change channels, press ENTER on the Dolphin after entering a

Due to RCA design (1983-1987), only the

channel number.

Tried "Search Method" and still could not PROBLEM:

find a working code.

clearing out the device key as follows: Press and hold ENTER until red light blinks

Try the "Search Method" again after

twice, then release. Next enter 9 - 9 - 2. Then press and release the device key to be

cleared twice.

PROBLEM: Dolphin does not control spa (but does

control other devices).

If spa has RF receiver: 1) Try it at different distances. You may be too close or too far away. 2) Make sure the correct address is SOLUTION:

set on the spa for the set up code you entered on the Dolphin. Set the spa address back to 0. If your spa has addressing capability, enter set up code 0000 on the Dolphin. If that works, set a new address on the spa, and enter the corresponding set up code on the Dolphin.

If it stops working again, the necessary equipment for address is probably not installed in the your spa. In that case, set it back to 0/0000 and leave it there.

PROBLEM: Dolphin and spa are set to an address but

still experiencing interference from

neighbor's spa.

SOLUTION: You and your neighbor may have chosen the same address. Choose a different address and corresponding set up code.

My spa was just serviced. Everything works now, except for my remote. PROBLEM:

SOLUTION: Reprogram the spa address last used. Repeat the Spa Addressing procedure if you don't remember the address.
